DESCRIPTION _____

DESCRIPTION _____

DISCLAIMER: INTEGRATIVE VETERINARIAN offers services and education in many domains of CAM (complementary/alternative medicine). Our focus is on modalities that complement traditional Western medicine. We use biologically based therapies (nutraceuticals), manipulative and body based techniques (massage, chiropractic), energetic medicine (acupuncture, Reiki, laser therapy, etc), and traditional medicine. Most of these modalities are not scientifically proven by evidence-based medicine.

The ultimate overall goal is to help the body heal itself.

NOTE: Integrative Veterinarian is not a traditional veterinary clinic. We highly encourage you to continue your relationship with your primary care veterinary practitioner.
